ABOUT ME

I am Adeeb Fawwaz, a Mechatronics Engineering student with a strong interest in mechanical design and programming. I have hands-on experience in CAD design using AutoCAD and SolidWorks, where I create precise 2D drawings and 3D models. Alongside my design skills, I have a solid foundation in Java programming, which supports my understanding of automation, control systems, and problem-solving.

SKILLS

- Java
- Excel
- SQL
- Figma
- 3D Rendering & Visualization
- Communication

DESIGN TOOLS

- Autocad
- Solidworks

EDUCATION

Pursuing Bachelor of Technology
Mechatronics in Sri Manakula
Vinayagar Engineering College.
Batch (2023-2027)

HSC
SRVS National Hr Sec school
Batch (2022-2023)

SSLC
Kamalia high school
Batch (2020-2021)

ACHIEVEMENTS

Completed an RFID-based access control project, applying mechatronics concepts in real-world security systems

EXPERIENCE

INTERN PUDUCHERRY POWER CORPORATION
LIMITED (PPCL)

(2024-2025)

Puducherry

- Gained practical exposure to power plant operations and industrial systems.
- Observed the working of electrical, mechanical, and control systems used in power generation.
- Assisted engineers in understanding maintenance procedures, safety protocols, and equipment handling.
- Learned about turbines, generators, boilers, and auxiliary systems used in thermal power plants.

PROJECT

(2024-2025)

RFID Door Lock Access Control System

- Designed and developed an RFID-based access control system to provide secure door locking and unlocking.
- Used RFID technology to authenticate users and allow access only to authorized cards/tags.
- Integrated microcontroller, RFID reader, electronic lock, and control circuitry for system operation.
- Implemented logic to verify RFID credentials and control the locking mechanism accordingly.

FIGMA

(2025-2026)

Designed a Swiggy-inspired food delivery app UI using Figma

- Designed a Swiggy-inspired food delivery app UI using Figma, featuring a modern and clean layout with intuitive navigation, essential screens like home,
- restaurant listings, menu, cart, and checkout, consistent colors and typography,
- reusable UI components, and a strong focus on user experience and usability..
